## Product Requirements Document (PRD)

### Full Consultancy CRM System for Education Tree Global

**Document Version:** 1.0

**Date:** December 19, 2025

**Prepared By:** Anushila Basnet - Business Analyst Intern

**Client:** Education Tree Global

---

## Executive Summary

Education Tree Global requires a comprehensive CRM system to streamline their international education consultancy operations across multiple branches. The system will manage the complete student lifecycle from initial enquiry through visa approval, enabling efficient lead management, document handling, and team collaboration. This CRM will support multiple user roles with customized permissions, automated workflows, and robust analytics to improve operational efficiency and student conversion rates.

---

## 1. Project Objectives

**Primary Objectives:**

- Centralize lead and student management across all branches
- Automate lead assignment and follow-up processes
- Eliminate data redundancy through single client records
- Streamline document collection and verification workflows
- Enable role-based access control for different team functions
- Provide comprehensive analytics and reporting for decision-making

- Track counsellor performance against set targets
- Improve client conversion rates through systematic follow-ups

**Business Goals:**

- Reduce duplication of data
- Improve response time to enquiries
- Increase student conversion rates
- Enable data-driven decision making
- Enhance team accountability and transparency

---

# 2. Scope

## In Scope:

- User and role management (Super Admin, Counsellor, Telecaller, Application Team, Admission Team, Visa Team, Front Desk)
- Lead and enquiry management from multiple sources
- Automated lead assignment (Round Robin and Manual)
- Document collection and management with country-specific checklists
- Application, admission, and visa processing workflows
- Follow-up reminders and notifications
- Automated birthday wishes email for clients and staff
- Counsellor target tracking and performance measurement
- Analytics, reporting, and data filtering
- Activity logs and audit trails
- Branch management across multiple locations
- Notes and comments system

## Out of Scope:

- Payment processing and financial transactions
- Direct integration with university portals (manual process)
- Client-facing portal or mobile app
- SMS/Email marketing campaigns
- Third-party CRM integrations
- Automated document verification (manual verification by teams)

---

# 3. Project Overview

This document outlines the requirements for a Full Consultancy CRM System designed to manage the complete student lifecycle from initial enquiry to visa processing for Education Tree Global's international education consultancy business.

---

# 4. System Users & Roles

## 4.1 Super Admin

**Primary Responsibilities:**

- Create and manage unlimited user accounts
- Create and manage branches
- Assign roles to users
- Configure role-based permissions for each user type
- Set counsellor targets/quotas
- Access activity logs
- Control data backups
- Full operational oversight
- Access analytics and reports with filtering options

## 4.2 User Roles

The system supports the following user roles, each with specific permissions set by the Super Admin:

1. **Counsellor** - Handles lead follow-ups, document collection, and student guidance
2. **Telecaller (Marketing Team)** - Manages enquiries, categorizes leads, initial follow-ups
3. **Application Team** - Processes student applications and university submissions
4. **Admission Team** - Manages university portals and admission processes
5. **Visa Team** - Handles visa documentation and processing
6. **Front Desk** - Receives walk-ins and assigns leads to counsellors

**Authentication:** All users must log in using their consultancy-provided email and password.

---

# 5. Client Entry Points

The system handles two types of client entry:

## 5.1 Enquiry (Online)

- **Source:** Social media platforms (Facebook, WhatsApp, etc.)
- **Handler:** Telecaller (Marketing Team)
- **Process:**
  1. Telecaller receives enquiry
  2. Telecaller categorizes enquiry with status: **Heated**, **Hot**, **Warm**, or **Out of Contact**
  3. If status is **"Heated"**, Telecaller assigns the enquiry (now a **Lead**) to a Counsellor
  4. Special Case: If heated lead submits required documents before visiting the branch and documents are qualified, application goes directly to Application Team

### 5.2 Walk-in

- **Source:** Physical visit to branch
- **Handler:** Front Desk
- **Process:**
  1. Front Desk receives walk-in client
  2. Front Desk checks if client previously enquired
     - If previously enquired: Pass to Marketing Team → Marketing marks as Lead → Returns to Front Desk
     - If new client: Front Desk directly assigns to Counsellor

---

## 6. Lead Management

### 6.1 Lead Assignment

- Leads are assigned to Counsellors by Front Desk (for walk-ins)
- Leads are assigned to Counsellors by Telecaller (for heated enquiries)
- **Assignment Methods:**
  - Round Robin (automatic rotation)
  - Manual selection
  - System must support both options

### 6.2 Mandatory Lead Information

The following information must be captured for every lead:

- Name
- Phone Number
- Email Address
- Date of Birth (for automated birthday wishes)
- Source (Walk-in, Facebook, WhatsApp, etc.)

- Interested Service
- Interested Country
- Branch
- Status
- Comments/Notes

### 6.3 Counsellor Target Management

- Each Counsellor has a target quota set by Super Admin
- Target varies per Counsellor
- Target count decreases when a student's visa is approved

---

## 7. Student Application Workflow

### 7.1 Standard Workflow

1. **Counsellor Stage:**
    - Views assigned leads
    - Follows up with leads
    - Collects required documents from lead
    - Lead converts to Student when they decide to proceed with application
    - Passes collected documents to Application Team
2. **Application Team Stage:**
    - Accesses documents collected by Counsellor
    - Processes application documentation
    - Submits applications to universities
3. **Admission Team Stage:**
    - Manages university portal interactions
    - Handles admission confirmations

- Coordinates with universities

4. **Visa Team Stage:**
    - Handles visa documentation
    - Processes visa applications
    - Tracks visa status until approval

### 7.2 Document Management

- Counsellor collects documents and uploads to system
- Application Team can access these documents
- System must have country-specific document checklists
- Common documents across countries must not be duplicated (same document used for multiple countries)
- Mandatory Rule**:** System does not allow skipping document collection. All required documents must be uploaded before proceeding to next stage.

### 7.3 Rejection and Re-application

- If student gets rejected by a university, their application is closed
- Student can re-apply to another country
- System maintains single student record (no data duplication)
- Only new/additional country-specific documents are requested

---

## 8. Follow-up and Notifications

### 8.1 Automatic Reminder System

- If an enquiry or lead has no response from the client, the system sends a reminder to the Counsellor after **1 week**
- Reminder format: Pop-up notification or system alert
- If still no response after first reminder, system continues to remind weekly
- Reminders continue for up to **2 weeks** (total of 2 reminders)

### 8.2 Lead Status Management

- If no contact is established after reminder period, lead is marked as **"Out of Contact"**
- Leads are not deleted from the system
- Out of Contact leads remain in the system for future reference

### 8.3 Automated Birthday Wishes

- System automatically sends birthday wishes via email to clients (leads/students)
- System automatically sends birthday wishes via email to staff members
- Birthday date must be captured during client registration and staff profile creation
- Emails are sent automatically on the birthday date
- Email templates can be customized by Super Admin

---

## 9. Data Management and Security

### 9.1 Single Client Identity

- Each lead/student must have only one record in the system (no duplication)
- If a student applies to multiple countries, the same record is used
- Only additional country-specific documents are added to existing record
- This prevents data redundancy and maintains data integrity

### 9.2 Source Tracking

- Every lead and student must have their source of entry recorded
- Sources include: Walk-in, Facebook, WhatsApp, or other platforms
- Source information is mandatory and must always be visible in the client record

### 9.3 Notes and Comments

- Telecaller and Counsellor roles can add notes/comments to client records
- Notes should be timestamped and show which user added them
- Notes are viewable by authorized roles

### 9.4 Branch Assignment

- Each client is assigned to a specific branch
- Branches are located across wide geography
- Branch assignment is based on client location or preference

---

## 10. Analytics and Reporting

### 10.1 Super Admin Dashboard

- Super Admin has access to comprehensive analytics and reports on all aspects of the system
- Reports must be visual and easy to understand

### 10.2 Filtering Options

Super Admin can filter data based on:

- Branch
- Counsellor
- Course/Service
- Country
- Date Range (From date - To date)
- Lead Source
- Student Status

### 10.3 Report Types

The system should provide reports on:

- Total leads per branch/counsellor/period

- Conversion rates (Lead to Student)
- Counsellor performance and target achievement
- Application success rates per country
- Visa approval rates
- Source effectiveness (which sources bring most conversions)
- Time taken at each stage of the process

### 10.4 Activity Logs

- Super Admin has access to all user activity logs
- Logs should track: user actions, timestamp, changes made, and affected records

---

## 11. Technical Requirements

### 11.1 User Authentication and Authorization

- Role-based access control (RBAC)
- Each user logs in with consultancy-provided email and password
- Permissions are configurable by Super Admin for each role
- Different roles have access to different modules and features

### 11.2 System Features by Role

**Super Admin:**

- Full system access
- User and branch management
- Role and permission configuration
- Analytics and reports
- Activity logs
- Data backup control

**Counsellor:**

- View assigned leads
- Follow-up management
- Document collection
- Add notes/comments
- View own performance metrics

**Telecaller (Marketing):**

- Manage enquiries
- Categorize leads (Heated/Hot/Warm/Out of Contact)
- Assign leads to counsellors
- Add notes/comments
- Follow-up tracking

**Front Desk:**

- Receive walk-ins
- Check previous enquiry history
- Assign leads to counsellors (manual or round robin)

**Application Team:**

- Access student documents
- Process applications
- Update application status
- Track university submissions

**Admission Team:**

- Manage university portals
- Handle admission processes
- Update admission status

**Visa Team:**

- Access visa documents
- Process visa applications
- Update visa status

### 11.3 Data Backup and Security

- Regular automated data backups
- Super Admin control over backup schedules
- Secure data storage
- User activity tracking

---

## 12. Success Criteria

The CRM system will be considered successful when it achieves the following:

- Seamless lead management from enquiry to visa approval
- Clear role-based access and permissions for all user types
- Elimination of data redundancy through single client records
- Efficient document management with country-specific checklists
- Automated reminders and follow-up tracking
- Comprehensive analytics and reporting for Super Admin
- Real-time visibility of student progress across all stages
- Counsellor target tracking and performance measurement

---

## 13. Assumptions and Constraints

### Assumptions:

- Users have basic computer literacy and internet access
- Each branch has stable internet connectivity
- Document uploads will be in standard formats (PDF, JPG, PNG, etc.)

- University portals are accessible by Admission Team

## Constraints:

- Country-specific workflows may require future updates as requirements change
- Document checklists need to be maintained and updated regularly
- System must handle multiple branches across wide geography

---
